PREFACE

This summary reports fresh fruit and vegetable arrivals in the eastern cities indexed on Page 3. Commodities reported are shown on Page 4. Some commodities are combined into general classifications. The proportion of each item represented in these general classifications may be established by appropriate sampling of daily reports issued by the market being studied.

A table of the most commonly used containers for major commodities is shown on Page 5. Net weights for other commodities shown in this summary, as well as factors used to convert railcars and piggyback vans to weight units, are available upon request.

A summary table reporting 3-year comparison of city totals is shown on Page 6. Arrivals for each city are reported in three tables in units of 1,000 hundredweight, as follows:

Table A - Outlines 3-year comparison by commodities and modes of transport. The estimated percentage of completeness for truck arrivals is shown at the bottom of this table.

Table B - Outlines city totals by States of origin and months.

Table C - Outlines detail by commodities, States of origin, months, and modes of transport.

Boat and air arrivals are reported under the rail columns. They are identified in Table C by the following symbols adjacent to the State of origin: BT = boat and AIR = air. RT identifies rail movement in rail-truck (piggyback) service.

Imports shown in this summary are those moving through the regular market channels of each reporting city. Some boat and air receipts may be reshipped to other markets via surface transportation.

The reports generally cover the metropolitan area of each city and attempt to include all locations where fresh fruits and vegetables are received or warehoused in volume. The metropolitan areas represent those designated by the U.S. Office of Management and Budget as standard metropolitan statistical areas and are published by the U.S. Department of Commerce, Bureau of the Census, in the "Statistical Abstract of the United States."

The cooperation of jobbers, carlot receivers, chain store employees, and other members of the produce industry in reporting truck arrivals, and of railroad, air, and steamship agents in reporting rail, air, and boat arrivals is appreciated. The assistance of plant protection and quarantine personnel, employees of State departments of agriculture, Canada Department of Agriculture, and farmers' markets enables the Fruit and Vegetable Market News Service to compile and publish these reports. That assistance is gratefully acknowledged.
